INFORMATION ABOUT THE DEVICE

Adjustable and foldable roof with monocrystalline panels.

A special detachable panel.

LED lighting.

Light aluminium construction.

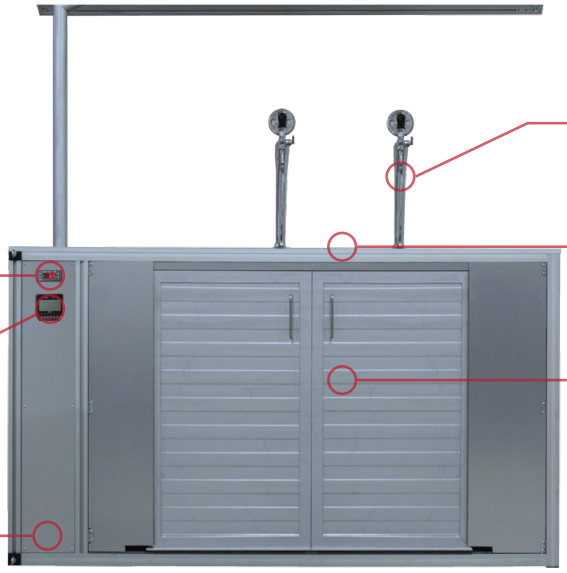
Stainless steel table meets hygiene requirements.

Space for your advertisement.

Space for your advertisement.

A special solar panel generates power even in the shadow.

Wheels for easier handling.



Thermostat.

The LCD displays external and internal temperatures, the battery level and power flow.

A CO2 and N2 tank and a compressor to pressurize kegs.

Faucet - according to the customer's needs.

A detachable drip tray.

Double door.

The Solar Tap is a fully energy autonomous beverage dispensing and cooling device for two kegs. The power is supplied by photovoltaic panels the design and position of which ensure that energy is gained even in unfavourable conditions. Energy is stored in batteries and therefore, the device can also be used at night. Despite its energy independence, the device can be connected to the public electricity network and used indoors. This way, your drink will be perfectly cold wherever and whenever needed. The ideal utilization is in remote areas with no connection to the public power grid, and at restaurants, gardens, terraces, festivals or any social events.

The device keeps your beverage cold for at least 24 hours with no power and no sun.

MORE DETAILS	
Maximum power of solar panels	630Wp
Volume of the cooling box	230 l
Solar energy is transformed by the combination of amorphous and polycrystalline solar panels.	
The device contains a 230V inverter to supply the power to small appliances, such as chargers of mobile devices, cash registers, etc.	

CoolArt Technology

from the future

We are artists, we are experts on cooling and we are excellent at it! We deliver something you have never seen before and that is not everything! We will never stop the development. We want to change the world and therefore, we are first changing ourselves and our view of the production of cold. We believe that we will cause global cooling. We save energy and our planet. We have patents, which make the world around us better and we are proud of this.

We are the CoolArt Technology team.
